

5 YEARS WARRANTY CONTRACT

Warranty Contract Cramm Yachting Systems

Standard Cramm Yachting Systems delivers products (new and refitted) with 12 operational months warranty, after commissioning of the products.

The standard warranty can be extended to 5 years (60 months) with a warranty-contract. With this contract every year an Cramm-engineer visits the products and does inspection for the product-status, including repairs of small problems.

5 years of warranty is an extraordinarily long guarantee period.

As a true partner in project, Cramm Yachting Systems can realise the entire process involved in fitting out your boat with hydraulic systems, from design, development and manufacture to commissioning, guarantee and maintenance. This allows Cramm to monitor every phase of the process, ensuring an exceptional level of operational security. As a result, we can also offer an exceptional 5-year guarantee on all systems, equipment and products.
